Text Responses

Improvement suggestions

be more involved to be a better student

Add more Computer Science Concepts (Big O Notation) (Sorting Algorithms) (Exposure to Other APIs)

make the course materials and labs slightly easier since most of the class seems to be struggling. The professor does a really good job explaining it. It's just the homework problems that are extremely challenging.

Have one or two less difficult programs for the students to work out, so they can better wrap their heads around the main concepts. Then provide them with the challenging labs to reinforce the concept they just worked with.

Ease the ramp up in workload

Use more examples to show how the codes work.

spend more time in class going over the homework or labs

Have a student project towards the end of the course. Allowing students to build their own product based on the C++ language would allow them to gain exposure to having to do their own research in the programming language.

Comments for professor

10/10; 100/100. Someone gives this professor a medal. Best Comp Sci prof

Ease the ramp in workload as sometimes it felt like there was too much to do. I like the current way of having a lab to do during lab period and homework outside of class instead of having both to do outside of class. Have labs during lab periods earlier on so theres more time to get used to them.

Derbinsky Rocks

You are a very good teacher, and were very helpful in office hours for extra help.

You're doing an amazing job teaching the course materials and explain stuff in a really understandable way. The homework projects seem to be slightly harder but that's a good thing since it readies us for the real world after college. Never stop being awesome.

Professor is very challenging but works hard to help you if you are willing to work hard.

I think you're doing a great job, you communicate the course material in a manner that allows for everyone to grasp the concepts quickly. Looking forward to taking more classes with you.
