Text Responses

Improvement suggestions

Nothing

Leave it as is.

Allow single-person projects. It makes working on the project more flexible.

Don't let go of Prof Derbinsky

I would have liked to learn more about machine learning, but given the time and prerequisite constraints, it is understandable we were not able to cover as much.

The course was perfect.

Other comments

Great Course!

Thank you for a wonderful semester!

Pacman was fun

Comments for professor

I wish you the best of luck in your transition to Northeastern. The course was well structured and challenging. Thank you for your time. - Justin Gagne

I felt the professor was a bit hard to approach, but he was certainly able to teach well and answer any questions I had.

Awesome class. Probably one of the more difficult classes that I have taken at Wentworth.

Best professor I have taken at Wentworth, wish you weren't leaving to NEU, but good luck over there.

Nice stuff, we'll miss you round these parts

Good professor, fun class

You have been the best professor I've had the pleasure of learning from at Wentworth.

The autograder (and excel equivalent) are a huge help in learning, keep doing that! But otherwise, this was the best class I've ever had. The classroom environment was very conducive to learning and you did a great job of explaining everything such that it was easily understandable.
